On September 11, 2001 we watched our country come together in one of the largest tragedies on US soil. 414 first responders passed away that day and thousands more since from health complication. 60,000 to 70,000 responders were exposed to toxic dust. 2,000 first responders were injured trying to help that day and thousands were diagnosed with cancer. James Hagner was a volunteer fireman that responded day. He got to the site at 8:00am and slept there for 3 weeks, spending 43 days at the site. Hagner, now 44, has been disabled since the age of 36 as a result of the 9-11 events. After enduring a diabetic coma in May 2013, the doctors had told him he had the lungs of a 92 year old. He was given only 2 years to live. Four days later, Hagner went on a diet and started working out, losing 144lbs in only 6 months. But things took a turn. On

January 25th, 2016 Hagner weighed 427.6 lbs due to depression, being sick from 9/11, being on prednisone amongst life's challenges. James Hagner is no quitter. Just one week after having knee surgery last May, 2016, he hit the gym to work out. Determined once again to lose weight. But this time, hagner had a larger goal in mind.

James Hagner is a hunter, former Marine, First Responder from 9-11 Ground Zero (43 Days Spent there). James and his Fiance Sara Jacobson have 5 children between the two of them and the youngest is now 7 months old. James Hagner weighed 427lbs this past January, 2016. He started the Retro Fitness 90 Day Challenge, and is now 295lbs. He won 2nd Place across the country. He just did a commercial testimonial for them. James officially has over 90 Sponsors for the event. If anyone would like to get involved with us, it would mean the world to all of us. Please contact Sara.
